# Introduction

TMULTIVERSE was born out of the idea of a unified yet decentralized MULTI-UNIVERSAL world similar to the oasis from Ready Player One. The oasis is the true metaverse where no matter where you are or what you do, you can enjoy, play, earn, and shop as well as meet new people in a MULTIVERSE in and of itself.

# What is MULTIVERSE

TeMULTIVERSE IS THE DECENTRALIZED MULTI-UNIVERSAL HUB FOR ALL METAVERSE PROJECTS ACROSS ALL CHAINS MULTIVERSE IS THE OASIS FROM THE MOVIE READY PLAYER ONE BROUGHT TO REAL LIFE IT IS BEING DEVELOPED TO CONTAIN "WORLDS WITHIN WORLDS" AN EVER EXPANDING DECENTRALIZED MULTIVERSE DESIGNED TO BRING METAVERSE PROJECTS TOGETHER AND EVENTUALLY BECOME A UNIFIED VIRTUAL REALITY BASED METAVERSE AS MORE AND MORE PROJECTS ARE INTEGRATED AND DEVELOPED WITH VIRTUAL REALITY THE MV TOKEN IS STANDS AS a part of the FOUNDATION FOR EVERYTHING HAVING ALREADY LAUNCHED ON BINANCE SMART CHAIN MOONRIVER HARMONY ONE AND A IDO VIA SUSHISWAP'S MISO LAUNCHPAD TOGETHER WE WILL UNITE THE METAVERSE AND BUILD A TRULY DECENTRALIZED MULTIVERSE FOR ALL TO ENJOY!👾🔥

# Problems

## → High cost of fees on chains like ethereum

Gas fees on ethereum are extremely high and inconsistent especially when the network is congested for example the metaverse project otherside released its land sale on opensea on the ethereum blockchain which drove gas fees as high as 2 eth and basically made then network unusable tmost metaverse projects launch on the ethereum chain due to the fact that so many people are already using it it has been the most widely used chain for some time

## → Metaverse Project integrations

when it comes to metaverse project and game integrations the issue arises when 1. trying to get other projects to want to become part of our decentralized MULTIVERSE 2. developing and redeveloping metaverse projects i.e games stores malls and more with VR and AR technology as we eventually switch our MULTIVERSE to a VR and AR centric place

# Solutions

## → High gas fee cost on chains such as ethereum

MULTIVERSE token is deployed on chains such as polygon binance smart chain and more due to there low gas fees as well as fast transaction finality we will eventually deploy on Ethereum if the chain gets to a point where cast fees are down we as plan to help other metaverse projects move from Ethereum in the interest of putting users first we have 1 other way to combat all gas fees but there will come a time for that in the future

## → Metaverse Project integrations

The first thing is getting projects to want to integrate with MULTIVERSE and become part of our MULTIVERSE for this we plan to offer projects games stores company;s a variety of incentive packages to entice them to take the leap 2 we have to help prrojects that join us further develop there projects turning some from simple 3d worlds to a virtual reality base MULTIVERSE as projects integrate we will deploy specific teams tasked with doing just that we know it sounds like alot and yes it will take time but some of the work is already being done 1 with cross chain technology advancing everyday 2 some projects that integrate are already in VR for those it will be simple and last the projects not already in VR are already developed to a certain point with everything already laid out a team will be able to get right to work

# Benefits

## STABILITY

MULTIVERSE will provide a stable income stream from staking as well as selling items you create or stores you open or the games you play in MULTIVERSE .

## TRANSPARENCY

Once MULTIVERSE DAO is deployed we will release all documents to the public making MULTIVERSE open source

## SECURITY

Security is a top priority and our smart contracts for MULTIVERSE token as well as MULTIVERSE will undergo manual and automatic auditing

## BLOCKCHAIN TECH

MULTIVERSE is being developed on and will be deployed to EVM compatible chains in the beginning due to their compatible nature and smart contract capabilities as we move more toward our goal we will launch on other chains through bridge like technology

# Whats NEXT

Next we get to work the real work laying the foundation of MULTIVERSE much like developing an open world VR game like GTA but on a much grander scale we will also be launching MULTIVERSE DAO with a unique NFT twist and many more exciting things that make up what MULTIVERSE IS

Made with VISME

# Conclusion

MULTIVERSE is the decentralized hub for all metaverse projects much like the oasis the MULTIVERSE-MV token is part of the foundation and will be an integral part of everything we will.

MULTIVERSE token will be used for things such as nft purchases staking MULTIVERSE in world items and more
